Engineering

Program Description
Engineering involves the application of science, mathematics and technology to solve and analyze a wide range of problems. In today's society, engineering specialties include civil, electrical, mechanical, chemical, materials, industrial, aeronautical, environmental and computer engineering, among others. In general, engineers participate in the activities which make the resources of nature available in a form beneficial to society and provide systems which will perform optimally and economically.

The Engineering transfer program at Santa Barbara City College provides lower-division engineering coursework equivalent to the first two years of education at a 4-year university leading to a Bachelor of Science Degree. At Santa Barbara City College, all Engineering transfer students major in Engineering and do not declare a specific branch of engineering study until after they have transferred to a 4-year university. An Associate in Science and an Associate in Arts may also be obtained.

Planning a Program of Study
Students should work with Santa Barbara City College's counseling staff in planning semester-by-semester programs of study. Important conditions to be met by students majoring in the Physical Sciences include:

1. The number of units taken each semester is a matter of personal choice. Students who work full-time should take a reduced course load.
2. Many required courses are in sequences—which must be taken in the prescribed order (e.g., MATH 150 Calculus with Analytic Geometry I, MATH 160 Calculus With Analytic Geometry II, MATH 200 Multivariable Calculus/MATH 210 Linear Algebra and MATH 220 Differential Equations). Some courses are prerequisites for courses in the sequences (e.g., MATH 150 Calculus with Analytic Geometry I is a prerequisite for PHYS 121 Mechanics Of Solids And Fluids). Some sequences are especially important for the sciences. The sciences do require reading, writing and mathematical skills. Science textbooks are typically at a grade 13-14 reading level. Students deficient in such skills have a unique opportunity at Santa Barbara City College to quickly and efficiently reach the levels required in the majors programs through the following sequences:

English Sequence
1. Passing score on placement exam (to) ENG 110 Composition and Reading (to) ENG 111 Critical Thinking and Composition Through Literature; or
2. English Skills (to) ENG 098 Fundamentals of Composition (to) ENG 110 Composition and Reading (to) ENG 111 Critical Thinking and Composition Through Literature

Mathematics Sequence
1. MATH 095 Elementary Algebra (to) MATH 111 (to) MATH 137 College Algebra (to) MATH 138 Precalculus (to) College Algebra and Trigonometry (to) MATH 150 Calculus with Analytic Geometry I, MATH 160 Calculus With Analytic Geometry II, MATH 200 Multivariable Calculus/MATH 210 Linear Algebra, MATH 220 Differential Equations; or
2. High school algebra and trigonometry plus passing score on placement exam (to) MATH 150 Calculus with Analytic Geometry I, MATH 160 Calculus With Analytic Geometry II, MATH 200 Multivariable Calculus/MATH 210 Linear Algebra, MATH 220 Differential Equations

Special Note: If you have not been tested for appropriate course placement in respect to the aforementioned sequences, contact the Counseling Center for up-to-date pre-enrollment testing schedule information. You should make sure that you have the necessary skills for each class taken—in order to succeed and/or progress in your chosen major.

Other important sequences include:

Chemistry Sequence
1. CHEM 101 Introductory Chemistry or high school chemistry (to) CHEM 155 General Chemistry I (to) CHEM 156 General Chemistry II.

Physics Sequence
1. PHYS 102 Introductory Physics For Science Majors or high school physics (to) PHYS 121 Mechanics Of Solids And Fluids (to) PHYS 122 Electricity and Magnetism or PHYS 123 Heat, Light and Modern Physics (to) PHYS 123 Heat, Light and Modern Physics or PHYS 122 Electricity and Magnetism.

Engineering Sequence
1. Most Engineering courses may be taken in any order. However, many Engineering courses have Physics and Mathematics prerequisites and corequisites. Students are encouraged to contact a counselor or faculty adviser for preferred sequences.

Preparation for Transfer
Course requirements for transfer vary depending upon the college or university a student wishes to attend. Therefore it is most important for a student to consult with his/her counselor and departmental adviser before planning an academic program for transfer.

Honors and Awards
The Physics and Engineering Departments select one student each year in each department as an Outstanding Student. Selections are based solely on academic excellence and no applications by students are required.

Programs of Study
- Engineering, Associate in Arts or Science (AA/AS) (https://catalog.sbcc.edu/academic-departments/engineering/engineering-aa)

Credit Courses
Engineering (ENGR)
ENGR 101 Introduction To Engineering (2 Units)
Skills Advisories: Eligibility for ENG 98 and ENG 103.
Hours: 36 (36 lecture)
Introduction to the engineering profession, engineering schools and four-year transfer programs. Discussion of methods and history of engineering, as well as guest speakers. Discussion of current areas of interest including engineering in the Santa Barbara area community. Recommended for all Engineering majors.
Transfer Information: CSU Transferable, UC Transferable
ENGR 102 Engineering Calculations with MATLAB (1 Unit)
Skills Advisories: Eligibility for ENG 98 or 103 and MATH 104 or 107 or 111.
Hours: 27 (13.5 lecture, 13.5 lab)
Introduction to engineering calculations using the MATLAB interactive environment software package for performing technical computations. Topics include matrix computation, numerical analysis, graphics and m-files (source code). Designed for people who have no MATLAB experience and who may not have any previous programming experience.

ENGR 105 Engineering Graphics (4 Units)
Prerequisites: Proficiency in MATH 1 or MATH 41.
Skills Advisories: Eligibility for ENG 98 or 110 or 110H.
Hours: 108 (54 lecture, 54 lab)
Graphic/visual communication, emphasizing the engineering design process. Topics include the design process, freehand sketching, multiviews, dimensioning, tolerancing, auxiliary views, sectional views and computer-aided drafting using CADKEY or AutoCAD software.
Transfer Information: CSU Transferable, UC Transferable

ENGR 115 Statics And Strength Of Materials (4 Units)
Prerequisites: PHYS 121.
Skills Advisories: Eligibility for ENG 98 and ENG 103.
Hours: 72 (72 lecture)
Study of force systems, statics of particles and rigid bodies, and distributed forces. Analysis of structures, friction, centroids, moments of inertia, Mohr’s circle, shear and bending moment diagrams, and distributed forces.
Transfer Information: CSU Transferable, UC Transferable

ENGR 116 Dynamics (4 Units)
Prerequisites: ENGR 115 and MATH 160.
Skills Advisories: Eligibility for ENG 98 and ENG 103.
Hours: 72 (72 lecture)
Study and analysis of motions of particles and rigid bodies. Velocity, acceleration, relative motion, work, energy, impulse, and momentum. Vector mathematics where appropriate.
Transfer Information: CSU Transferable, UC Transferable

ENGR 117 Electronic Circuits (3 Units)
Prerequisites: MATH 160.
Corequisites: PHYS 122.
Skills Advisories: Eligibility for ENG 98 and 103.
Hours: 54 (54 lecture)
Introduction to electronic circuits. Includes AC and DC circuit analysis, transient and complete response, and operational amplifiers.
Transfer Information: CSU Transferable, UC Transferable

ENGR 117L Electronic Circuits Laboratory (1 Unit)
Prerequisites: MATH 160.
Corequisites: ENGR 117 and PHYS 122.
Skills Advisories: Eligibility for ENG 98 and 103.
Hours: 54 (54 lab)
Laboratory to accompany ENGR 117.
Transfer Information: CSU Transferable, UC Transferable
